

PEACCI

The Peacci "Creative" Kit

WHAT WE RECOMMEND FOR THE PERFECT CREATIVE AT HOME MANICURE - FOR WHEN YOU'RE STUCK AT HOME AND FEELING CREATIVE!

The GelBottle nail file: File in one direction only to get your nails into a smooth shape ready for painting! Whether you love rounded, squared or coffin - this is the file for you.

Peacci 2in1 base coat: a smoothing base coat and nail primer all in one, base coat will not only increase the longevity of your at-home manicure, but it will also improve the final effect. Peacci 2in1 is applied in one fast-drying coat, to prep and prime the nail ready for *smoooth* application.

3 X Peacci colours: You've never seen pigment like it from regular nail polish. Peacci has over 130 shades to choose from that promise to cater for all styles from the perfect sheer pink and a variety of nudes to classic reds, unapologetically bold neons and electrifying glitters. Apply two coats for longer lasting results, or why not try a different colour on every nail, or a colourful french tip!

The GelBottle nail art brush: Your best friend for creating detail and nail art from your own home. Use the detail brush for dots, shapes and patterns, or for an easy attempt at a french manicure, lines or letters.

Peacci Gel'ous top coat: Now THIS is where the magic happens. Gel'ous top coat doesn't just seal in your polish, allowing it to last longer and protect against chips - a generous coat of Gel'ous utilises gel polish qualities to achieve a shine which will have you saying "I can't believe this isn't gel." Whilst the top coat will dry normally like a regular polish, you can also dry it in sunlight to watch it cure like gel polish, provided a hard, shiny finish which is truly unrivalled.

Peacci cuticle oil: For a final touch, finish with a wipe of our juicy, peach scented cuticle oil. Using a combination of hydrating oils, paint a small lick of Peacci oil onto your cuticles and massage it in for a hydrated, professional finish that encourages your nails to stay healthy and strong! An essential to keep hands hydrated that are dried out from repeated use of hand-sanitizer.
